## CARRIER OBJECTIVE

---

Dedicated software developer skilled in web development using JavaScript, CSS, Bootstrap, and HTML, with experience in Groovy on Grails for creating dynamic applications. Focused on building user-friendly online systems and interactive platforms. Looking for a role to apply my skills, contribute to meaningful projects, and grow professionally.

## EXPERIENCE

---

### Intern (Ongoing)

**EBEST SOLUTIONS PVT. LTD.** — July 2024 - Present

Developing and maintaining web applications using Groovy on Grails.

Gaining experience in full-stack development and contributing to real-world projects.

## PROJECTS

---

### Spotify Website Clone-Technologies:HTML,CSS

Developed a responsive website replicating the Spotify user interface using HTML and CSS. The project includes a visually appealing homepage, a navigation bar, and styled playlists, showcasing proficiency in web design principles and front-end development. This clone highlights skills in creating structured, maintainable code and designing user-centric interfaces.

### Simon Game-Technologies:HTML,CSS,JS

Implemented a digital version of the classic Simon game, where players replicate sequences of colors. The sequence length increases with each successful attempt, challenging the players memory and concentration skills
